Study Sheet

Reading 3.3–3.5 · Chapter 3: Migration · pp. 77–93

Models and formulas

Gravity model
population A × population B ÷ distance
bigger places interact more; farther apart, less. The AP course often squares the distance; the book doesn't

Distance decay
the farther the destination, the **fewer** migrants
more short moves than long ones (Fig. 3.16)

Flow strength
how **alike** the places are + how well **information** flows back + **distance**

Displaced, 2018
40M IDPs + 25.4M refugees + 3.1M asylum seekers
the book calls it **8.6%** of the world; the math gives under 1%

Ravenstein's laws

1. Every flow makes a **countermigration**.
2. Most migrants move a **short distance**.
3. Long-distance migrants pick **big cities**.
4. **Rural** people migrate more than urban.
5. **Young adults** move abroad more than families.

- British demographer; studied **internal** migration in England, 100+ years ago.
- His law on volume (distance decay) → the **gravity model**. Planes and the Internet weaken it, but short moves still win.

Push and pull

- **Push:** leave. Work, retirement, cost of living, safety, disasters, weather and climate.
- **Pull:** go here. Often vaguer: based on **perception**, sometimes too rosy.
- **Intervening opportunity:** a nearer chance makes the farther goal less attractive.
- **Rural Brazil:** village → town → city → São Paulo or Rio (AP: **step migration**).
- Any factor can push or pull. Five types: **legal status; gender, ethnicity, race; environment; political conflict; family links**.

Legal status

- **Authorized** (documented): has a visa. **Unauthorized**: visa expired, or crossed without permission.
- U.S.: **43.7M** migrants, **10.7M** unauthorized (peak 12.2M before the recession); 2/3 of unauthorized adults here 10+ years.
- Mexico **26%**; South and East Asia **27%**. U.S. TFR **1.8**: immigration keeps it growing, adds workers and taxpayers.
- Temporary visas: doctors, engineers, construction, hotel, restaurants. **45,000+** seasonal farmworkers; Canada since **1966**; mostly Mexico and Central America.
- Fig. 3.18 (2000–2017): Mexico **2,897,000**; Dominican Rep. 688,000; Cuba 637,000; El Salvador 403,000.
- Border: fences, agents, tech; crossers pushed east into the **desert**; **coyotes** (smugglers); bottles and memorials (Tijuana, Fig. 3.19).
- Goods move freely, people don't. Slowdown: more the economy than walls.

Gender, ethnicity and race

- Jobs and safety depend on them; hiring by them shows **power** and reinforces stereotypes.
- Well-off women hire helpers of **another ethnicity**.
- **Toronto** agencies (Stiell and England): Caribbean "docile" → "aggressive"; Filipinas "naturally docile."

Where refugees go

- **83%** stay in their region; low-income → low-income neighbors.
- 2018 sources: Syria **6.3M**, Afghanistan 2.6M, South Sudan 2.4M. Hosts: Turkey **3.5M**, Pakistan 1.4M, Uganda 1.4M.
- Totals: **2.9M** (1970, mostly Palestinians) → 8M+ (1980) → **25.4M** (2018), incl. 5.4M Palestinians in camps.
- 60% of UNHCR's refugees: Afghanistan, Syria, Sudan, South Sudan, Somalia, DR Congo.

Environment

- Earthquakes, hurricanes, volcanoes, tsunamis, floods, fires, climate change; often **temporary**.
- **Katrina** (2005): wetlands destroyed by flood control, extraction, Army Corps, oil, developers. **85%+** flooded; population **−11%** (2000–2010); children **27% → 23%**; families to outer suburbs (Fig. 3.20).
- Climate refugees: **150–300M** from **40** countries by **2050**.
- **Tuvalu:** 12,000 people; atolls **2 m (6.5 ft)** up. Australia 24.1M. Tuvaluans **reject "climate refugee"**: passive victims; lets rich emitters off; migration a last resort (Farbotko).

Politics and family

- War makes refugees; **new borders** make migration too.
- **Partition, 1947:** British rule 1857–1947. Hindu India, Muslim Pakistan (two parts, 800 mi apart). Borders secret until after independence (Pakistan Aug 14, India Aug 15). From Aug 17: **14M** moved (7M Muslims → Pakistan; 7M Hindus and Sikhs → India); **~1M died**. Punjab split.
- **Chain migration:** family and friends follow the same path; chains → **immigration waves**.

Refugees and asylum

- **Refugee:** fled persecution or violence, **crossed a border**; most walk to a neighbor.
- **1951 Convention** (for postwar Europe): well-founded fear of persecution for **race, religion, nationality, social group, political opinion**.
- **UNHCR** + Red Cross + World Food Program: relief, camps, negotiation.
- **Asylum** (UN Declaration of Human Rights): protection, temporary stay.
- **Repatriation:** going home when safe. **Resettlement:** a third country, permanently (U.S.: **160,000 Karen** from Burma via Thai camps, 2007–2017).
- **Asylum seeker:** claim at a port or border; held; judge decides; refugee status or sent back.
- **IDP:** displaced but **still inside** their country; not refugees; often uncounted; can be worse off.

Areas of dislocation

- **Syria** (2011): 5.6M abroad (Turkey, Lebanon, Jordan, Iraq); **6.6M IDPs**. Zaatari: 3 sq mi, 100,000+. Arsal: 50–80,000, town ×3.
- **Rwanda** (mid-1990s): Hutu vs. Tutsi; 800,000–1M killed; 2M+ to Zaire and Tanzania; 500,000 home after 1996.
- **Israel/Palestine:** diaspora ~70 CE; Zionism; <50,000 Jews (1910); Balfour 1917; mandate 1919–48; 750,000 by 1948; **600,000** Palestinians out (1948); 1967 settlements ("facts on the ground"); 2M Soviet Jews (1991); 7.8M people. Jordan: permanent refugees; Lebanon: temporary.
- **Afghanistan:** ¼ of world's refugees. 1979 Soviets → double stream (Iran 2.5M, Pakistan 3.7M); 6M+ stayed; Taliban 1996 → counter-migration.
- **Iraq:** 1.85M Kurds (1991); 2003: 2M+ refugees, 2.8M IDPs; 200,000 Syrian Kurds; 1971 law.

More dislocation

- **West Africa:** 1.5M (1997, Liberia, Sierra Leone) → <270,000 (2013).
- **Sudan:** colonial borders; war 1983–2005 (2.2M dead, 5M displaced, 1.6M to Uganda); oil 1999; **Darfur**: Muslim vs. Muslim, 400,000+ killed, 2.5M displaced; Powell: genocide (2004). South Sudan 2011 → new refugees.
- **DR Congo:** ~6M dead since 1998; LRA 1M+ (2009).
- **South Asia** 3rd. Sri Lanka: Tamils vs. Sinhalese; 90,000 uprooted. **Bangladesh:** 156.6M, ≤20 ft, 230 rivers; pumping, mangroves; 17% by 2050; India's wall.
- **SE Asia:** 1–2M fled Vietnam (1975); Khmer Rouge 1.7M killed; Myanmar IDPs.
- **Europe:** Yugoslavia, 6,056,600 (1995). **Colombia** 5.7M IDPs. Haiti 2010: 200,000 dead.

Who's who

	Crossed a border?	Status
Refugee	Yes	Recognized; 1951 Convention; asylum
Asylum seeker	Yes	Claim pending
IDP	No	Not a refugee
Unauthorized	Yes	No visa, or overstayed
Guest worker	Yes	Authorized, temporary (3.1)

Policies block, invite or create

- **Block:** quotas, Chinese exclusion, White Australia, U.S. fences, India's wall, Liberty Shield.
- **Invite:** Bracero, temporary visas, refugee admissions, resettlement.
- **Create:** new borders: Partition (1947), Israel (1948), South Sudan (2011).
- Side effects: fences moved crossers into the desert; Bracero's end turned cyclical moves into permanent ones.

U.S. immigration policy, in order

When	Law or event	What it did
1820–1930	First wave	Almost all from **Europe**: north and west first, then south and east
1882–1907	Oriental Exclusion Acts	Kept Chinese out of California
1921	Quotas	**3%** of each nationality here in **1910**: favored northern and western Europe
1924 / 1929	Immigration Act; National Origins Law	**2%** of **1890**; **150,000** a year; 1920 origins shut out **Asia** → a trickle in the 1930s
1942–1965	Bracero Program	Mexican farmworkers, Southwest and Florida; **cyclical**. After 1965 they **stayed**
1943 / 1952	China, then Japan equal; 1952 act	Quotas for all, **160,000**; refugees far over it (7M+ 1945–1970)
1965	Quotas abolished	**170,000** outside the Americas, **120,000** from the Americas → second wave (Latin America, Asia)
1986	IRCA	Path to citizenship for **2.6M** unauthorized
~2000	Mexico peak	~1M a year; Mexicans ~30% of immigrants → ~25% after 2008; ~**4%** of U.S. people
2003	Operation Liberty Shield	Detained asylum seekers from **33** countries; Human Rights Watch objected; ended April 17

Before: Great Wall (1300s, keep Chinese in, Mongols out); **White Australia** (1901–1970s: no nonwhite immigrants, no Pacific Islanders). Europe after Madrid 2004 and London 2005: guard the shared space, **integration agreements** (Austria: 300 hours of language + civics). Most barriers are **legal**, not physical.

Common traps

- **Refugee vs. IDP:** the border decides. IDPs aren't refugees under the 1951 Convention.
- **Refugee vs. asylum seeker:** recognized vs. still waiting.
- **Unauthorized** includes visa overstays, not only border crossers.
- **Intervening opportunity vs. chain migration:** a nearer chance vs. following family.
- **Repatriation vs. resettlement:** home vs. a new third country.
- **1921 vs. 1924:** 3% of 1910 vs. 2% of 1890.
- **Darfur** was Muslim against Muslim: not only religion.
